BACKGROUND

Prevention Is Better than Cure slogan of Siddiqui foundation (R). From 2006 our organization has been working on its core project "Awareness & Protection" against spreadable diseases Hepatitis B & C, HIV, TB etc. Approximately thirty (30) million Hepatitis carrier patients have been registered in my country Pakistan and there is a very rapid growth in it and as a result due to liver cirrhosis, liver cancer the death ratio which has been reached in millions. It is huge threat for Pakistan as well as for the whole world. Siddiqui Foundation® main mission is to create "Awareness & Protection" in the local community and to be a role model for other regions up till the complete eradication of this chronic disease.

METHODS

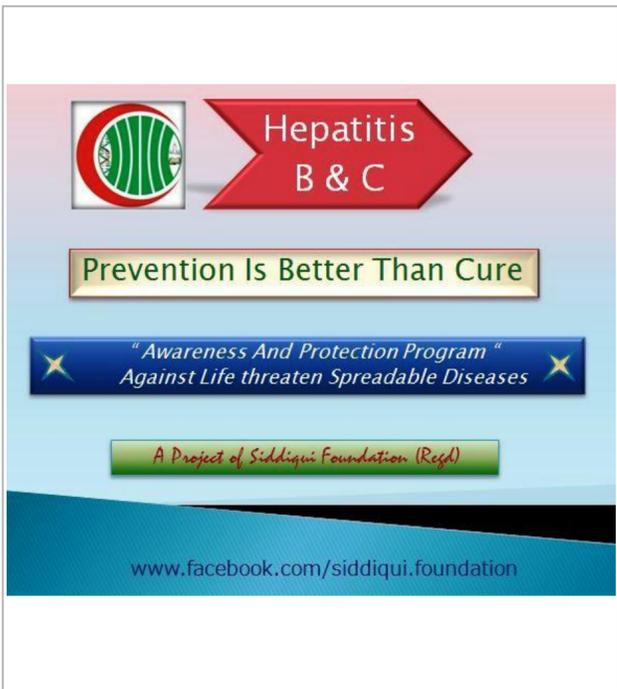

"Awareness" - For this Purpose we are creating awareness about Safety message to the general public and participate in different social events with the related professions like Barbers, Beauticians, Dentist and more important is to do work on all main sources in which virus transfer to each other. Distributed precautionary brochures in various community programs about Hepatitis B & C and this message reached in thousand of peoples. In coming days it will be announced on all media, conduct Seminars in different institutional platforms; arrange workshops in schools collages for young generation.

"Protection" "We are running a clinical lab with the name of "Siddiqui Lab "(The Research Vision). We are charging discounted test price from common peoples, free testing for deserving patients for their early diagnoses. Under this program we are serving thousands of patients per year and trying to establish lab network in other districts as well which will be functionally work in urban as well as in rural areas with complete services (Awareness, Vaccine, Diagnosis, Treatment, Screening camps, Data collection). As we also strongly recommend medical wastage treatment program which is one of the major cause of virus spreading in our city, country and south Asia. We are regularly conducting free medical camps with the collaboration of other organizations.

RESULTS

Initially arranged free Hepatitis B & C screening camps and awareness programs with related professions like Barbers, Beauticians, Dentist (Main sources of virus transfer to each other) also distributed precautionary brochures in various community social programs and our precautionary message reached in thousand of peoples

Purpose to groom our people with training sessions, to increase strong relationship between Ngo's and institutions. Step by step all other stakeholders will be included in this program from government and private sector because maximum efforts will get the desired results. This program could be a Strong bridge between social sectors of different countries and enhance health sector efficiency, to decrease carrier numbers with Hepatitis B & C. As the population of our district Sialkot is round about 4 to 5 million and we are trying our level best to provide all the benefits of our program to the every citizen of our city.

CONCLUSIONS

Awareness on regular bases will increase common peoples self conscious which is the most important way to decrease this deadly disease to achieve in time goals. Protection in different way will secure each and every one from this fatal disease.

In the light of this program governments & social sector and individuals will be linked up to work out jointly in a broad spectrum against this global threats.

With our efforts we would be able to overcome on this infectious disease from our homeland and will control the expiry ratio from this deadly disease.
